

# EV CHARGE CARD AND HOMECHARGE REIMBURSEMENT SOLUTION

## POWER YOUR BUSINESS ON THE ROAD AND AT HOME

### With our new EV Charge Card and Homecharge Reimbursement Solution.

Our innovative new EV products make powering your fleet effortless, efficient and easy to manage. Use them individually or connect both for one streamlined and seamless solution.

With 70% coverage of all chargers and over 80% coverage of rapid chargers\*, the EV Charge Card and app allow drivers to plan routes and stay charged with confidence.

Our Homecharge Reimbursement Solution allows you to track home charging and pay your drivers' home charging energy costs directly, meaning drivers won't be out of pocket for charging costs and all your fleet information is consolidated onto one platform.

This solution keeps fleets moving efficiently whilst reducing admin and improving cost accuracy. With clear reporting, streamlined billing and access to detailed cost and carbon data, our solutions help support your driver experience, operational efficiency and support your transition to electric vehicles with confidence.

### KEY FEATURES AND BENEFITS

#### Expansive Charging Network

70% coverage of all chargers and over 80% coverage of rapid chargers\*.

#### Drivers Never Out Of Pocket

Drivers' electricity charge costs are paid directly, meaning they are not out of pocket waiting for reimbursement and at rates which sometimes do not cover the cost.

#### Fraud Prevention

Option to only pay for charging on your drivers' work vehicles, check with the team to see if your vehicles are eligible. Verified via advanced direct vehicle linking.

#### Spend Insights

Get full visibility of individual and fleet charging costs and how they charge via a digital account management platform to help inform operational decisions.

#### Improved Cashflow

Payments are taken on a monthly basis by Direct Debit helping to improve cashflow.

#### Carbon Reporting

Detailed carbon analytics supports Scope reporting.
